

GARDENSCAPES ENVIRONMENTAL STATEMENT

At Gardenscapes, we are fully committed to engaging environmentally sympathetic and sound strategies to create a balance within our business.

We believe in promoting sustainable policies and practices, both within our premises and out on site.

These practices include:

- Eliminating or minimizing any pollutants.
- Practicing OH&S safe handling policies in regards to hazardous materials.
- Selecting raw materials with environmental impacts in mind, while ensuring our high quality product standards are not compromised.
- Working with our suppliers, partners and customers to support our efforts.
- Monitoring and minimizing usage of energy and water where applicable.
- Ensuring our delivery drivers and field representatives comply with any on-site environmental controls and policies.
- Maintaining our fleet of plant machinery to reduce emissions.
- Implementing tank water for utilization within yard, including dust-suppression.
- Regularly reviewing our performance against targets and implementing continuous improvement.

All Gardenscapes team members are encouraged to participate in the implementation and improvement of our Environmental Policy by:

- Contributing their vast experience and ideas towards developing better environmental work practices.
- Reporting any potential negative environmental impact.
- Maintaining a firm commitment to our environmental policies and having understanding of the importance for harmony between business and nature.

To this end, we believe, working together for best practice outcomes for all parties provides a solid commitment to a better future for all.
